

# Features & Benefits of the Refineosoft

## **Removes chemicals**

Beautiful full hair, soft healthy skin! Yes, imagine a system that not only softeners water but removes harmful chemicals and Chlorine - all in one machine. Removing chemicals just makes sense and will result in softer hair and skin.

## **Upflow regeneration**

Saves you money! Cleans from the bottom up, this allows the good media to be saved, whereas, down flow cleaning means the entire bed needs to be cleaned. This saves salt and water.

## **Proportionate brining**

Fewer heavy salt bags! Your Refineosoft will only use the amount of salt and water required at time of cleaning. It does not simply regenerate or clean the entire tank. It will calculate how much water or salt needed to clean the media?

## **Self-diagnostics**

Lower water bills! This unique product will tell you everything, such as a leaking toilet, how much water you use daily, to any service required. Gives you years of service at the lowest operation cost.

## **Dry salt storage**

Lasts longer! A great feature because it will eliminate salt bridging in your salt tank, a common problem with most water softeners.

## **Warranty**

The 20 year (lifetime) warranty is one of the best in the industry, and alone with our lemon clause gives peace of mind to those who invest in the Refineosoft.
